Professional Experience

Laravel Trainer

Mar 2024 - Present

Darrebni.

- Coaching software engineering graduates and students on "Darrebni" virtual platform, preparing them for successful careers with hands-on training in Laravel framework.

Laravel Developer

Jan 2021 - Present

Freelance.

- I Built a CRM Dashboard designed to help businesses manage their sales pipeline efficiently. It includes management for Accounts, Contacts, Leads, Deals, Products, and Users, providing comprehensive insight and control over customer relationships and sales activities
- I Built an online learning platform with admin controls for classes, subjects, lectures, student payments, subscriptions, and attendance tracking through a web app or mobile app
- I Built the backend for a platform for booking fitness and wellness home services, with features for managing memberships, services, subscriptions, and user payments, as well as displaying fitness videos
- I developed a comprehensive web application for a company that acts as a wholesale distributor of mobile network operator balances to small businesses. The application manages customer and employee cash flows, tracks debts, and processes payments for 30+ small businesses. It allows admins to monitor the company's balance and allocate funds from mobile network operators. Additionally, the platform handles profit distribution among company stakeholders. The system is designed to streamline business operations for both customers and employees while ensuring efficient cash management.

Laravel Developer

Jun 2024 - Jan 2025

Deved-up.

- Built a comprehensive system to manage a dental clinic, including reception, insurance coverage, and doctor treatments, with a custom reporting system, reducing manual processing time by 40%
- Built a simple CMS for DevedUp company

Team leader & Laravel Developer

May 2023 - May 2024

TrendDXB.

- Led a team of 3 developers and 2 designers to build an e-commerce web application
- Analyzed an employment platform project and designed its database.
- Built the back-end for a car rental service, enabling users to browse, book, and pay for cars online via a web or mobile app, enabling users to book and pay for cars in under 5 minutes

Laravel Developer

Aug 2022 - Apr 2023

Limitless group.

- Created a CV Maker web application, including project analysis, database design, and API development
- Refactored and enhanced features for a financial system handling balance transfers and tax payments, delivering high performance and optimizing database design.

Laravel Developer

Oct 2021 - Jul 2022

InSoft Online.

- Developed a Time Tracking web application, which helped users create professional CVs in less than 10 minutes.
- Created a task management web application, including project analysis and database design
- Configured APIs for a mobile store and booking system applications.

Education**Diploma in Software Engineering**

September 2019 - June 2024

Department of Software Engineering – TCC, Damascus University, Syria

- **Graduation Project:** Designed and implemented a healthcare web application to digitize hospital data, including an API for a pill reminder mobile app.
