PROFILE

As a Laravel developer, I thrive on creating well-structured projects with clean code. In 2020, my journey began during my graduation project. Over the years, I've gained valuable experience working on various projects and refactoring existing code, for different companies.

EDUCATION

Technical Computer College
2020 - Present
Damascus University, Syria

Department of Software Engineering

The graduation project was a Health care Web Application that Digitize hospitals data and configured an api for a pill reminder mobile application.

WORK EXPERIENCE

Laravel Software Developer
2023/02 - Present
TrendDXB | United Arab Emirates

- I made an e-commerce web application
- I analysed an employment platform project and designed it's database
- I made the Back-end for a car rental service that allows users to browse, book and pay for cars online through a web app or a mobile app
- I made a web application for an Electricity providing company that controls users electricity meters and bills, employees Cash Flow, and admins reports.

Freelance
2023/01 - Present

- I made an Online learning platform that includes admin control for classes, subjects, lectures, student payments, subscriptions, and attendance tracking through a web app or a mobile app.

Laravel Software Developer
2022/07 - 2023/02
Limitless Group | Syria

- I made a CV maker Web Application including analyzing the project and making its database and building APIs for the front-end.
- I refactored and added features to an exiting system for transfering balance and paying taxes including delivering high preformance and enhancing dataBase design

Laravel Software Developer
2021/10 - 2022/07
InSoft-Online | Germany

- I made a Time Tracking Web Application including analysing the project and making it's database and design.
- I made a task management web application including analysing the project and making it's database.
