

Abdul-Rahman Al-Jabban

Backend Laravel developer

Damascus, Syria • a.jabban2000@gmail.com • +963937731517 • [Portfolio Link](#)

SUMMARY

Backend Laravel Developer with 5+ years turning messy real-world processes into Laravel systems that hold up. Whatever your facility needs, I build the system for it, from the first discovery meeting to production. Currently leading a team of 3 at Ultra Solutions. Open to on-site or hybrid roles in Damascus.

SKILLS

Languages & Frameworks: PHP, Laravel, MySQL.

Laravel: REST APIs, query optimization, multi-tenancy, queues, role-based access control, PHPUnit.

Architecture: modular monoliths, S.O.L.I.D, design patterns.

Tools: Git, Docker, CI/CD, Redis.

PROFESSIONAL EXPERIENCE

ULTRA SOLUTIONS

Laravel developer & Team Lead

Syria
2025 - Present

- Led a team of 3 Laravel developers: planned and assigned work, reviewed code, mentored a junior developer, and reported delivery status to management.
- Built a hotel management system in Laravel end to end, from discovery meetings to production, as a modular monolith (8 modules) covering reservations, invoicing, cashbox reconciliation, and Syrian tax-authority integration.
- Built the onboarding and licensing service for a multi-tenant restaurant SaaS, with an isolated database per client and automated license enforcement.
- Built REST APIs for reporting over a POS and inventory MySQL database of roughly 80 tables.

FREELANCE (PART TIME)

Self-Employed

WORLDWIDE
2021 - Present

- **Trend System:** built a financial back-office in Laravel for a mobile-balance distributor, replacing their spreadsheets. It tracks bank, cashbox, and shareholder balances, client debts and advances, and Syriatel/MTN transfers, with profit margin per source.
- **Alsafwa:** added new REST APIs to an existing dental-clinic system and built an Excel-to-database import tool that replaced manual data entry for reference data.
- **Najeeb:** built an e-learning platform with role-based access control, subscriptions, attendance-based progress tracking, and a lesson calendar.
- **Al-Anwar:** built an internal platform for an electricity utility covering meter management, billing cycles, employee cash-flow tracking, and reporting.

DARREBNI

Laravel trainer

Syria
2024 - 2025

- Designed and taught a Laravel course to 50+ engineers, from fundamentals through clean code, testing, and building projects as a team.

TREND DXB

Laravel developer

UAE
2023 - 2024

- Built the entire backend and REST API for [Uranus](#), a car-rental booking platform, and led the frontend developer and UI/UX designer on the project.
- Built [Vida-Food](#), an e-commerce site for a UAE food supplier, end to end.

LIMITLESS GROUP

Laravel developer

Syria
2022 - 2023

- Worked on the backend of **Wesal** ([App Store](#), [Google Play](#)), a mobile credit-transfer and bill-payment app in Syria: cut transfer time from 6s to 0.5s by rebuilding the flow on queued jobs and removing N+1 queries, and handled outage recovery that flags paid-but-not-transferred transactions.

INSOFT ONLINE

Laravel developer

GERMANY
2021 - 2022

- Built an internal time-tracking and task management tool with per-project tasks and timers, per-employee admin reporting, and exportable monthly reports.

EDUCATION

DAMASCUS UNIVERSITY

Diploma in Software Engineering

2019 - 2021

Graduation project: a clinic management system replacing paper records. Doctors log visits, prescriptions, and lab results; patients view their history and get medication reminders. Led a team of 3, wrote the requirements document, and built the Laravel and MySQL backend, with a teammate building the Flutter patient app.
