

ABDUL-RAHMAN AL-JABBAN

BACKEND LARAVEL DEVELOPER

PERSONAL PROFILE

Backend engineer with 5+ years designing and scaling Laravel/PHP systems across finance, healthcare, e-commerce, and education. Specialized in REST API design, multi-tenant architecture, and performance optimization. Comfortable owning systems end to end, from database and security design through deployment, with experience leading small engineering teams and mentoring 50+ developers. Focused on clean, tested, maintainable code that holds up in production.

 - Testing: Unit/Feature (PHPUnit)
- **Languages:**
 - Arabic (Native),
 - English (Upper-Intermediate)

EDUCATION

Damascus University (2019-2024)
Diploma in Software Engineering

WORK EXPERIENCE

Senior Laravel Developer / Acting Tech Lead Ultra Solutions | 2025 – Present

- Architected a multi-tenant SaaS onboarding system with an isolated database per client, enabling secure data separation and per-tenant scaling.
- Built a Hotel Management System and adapted it into a configurable Villa Management platform by reworking the core domain model.
- Delivered features, REST APIs, and refactors across additional client products, including an educational platform and a restaurant/inventory-management system.
- Led a 3-engineer team across multiple projects, owning architecture, tasking, and delivery.

Laravel Trainer Darrebni | 2024 – 2025

- Trained over 50 software engineers in fundamentals, clean code, and teamwork.

Laravel Developer & Team Lead TrendDXB | 2023 – 2024

- Developed **Uranus**, a car rental platform with rapid booking capabilities,
- Developed **Vida-Food**, an e-commerce platform for a UAE food supplier.
- Managed a team of 3 developers and 2 designers, enhancing code quality and delivery timelines.

Laravel Developer & Team Lead Limitless Group | 2022 – 2023

- Worked on **Wesal (App store / Play store)**: a global payment system for mobile credit and bills in Syria, improving transaction speeds by 60% through optimized SQL queries and architecture.

Laravel Developer InSoft Online | 2021– 2022

- Created productivity tools such as time tracking and task management systems.

Freelance Laravel Developer Self-Employed | 2021– Present

- Developed Trend System, an ERP for mobile balance distribution, and **Alsafwa**, a clinic system integrating insurance to reduce manual tasks by 40%.
- Built Najeeb, an e-learning platform featuring RBAC, subscriptions, and payment tracking.
